### TEST COMMENTS:

*This location was planted in very nice soil conditions and had good emergence. Plot was very healthy all year long and had no disease pressure to speak of. Some of the varieties were still very green in the stem and were very tough to harvest. Large pod clusters on most of the plant until the top 6" to 8" which tapered off to two pod clusters with small seed size, most having two beans in a three-bean pod. This Henry location was very nice overall!*
