TEST COMMENTS:

Jim and Sharon have been working with FIRST for 22 years, hosting an outstanding plot location. On April 26, we were lucky to plant both corn and soybean plots in excellent condition, and things looked very good in June when we visited the plot to take soil samples and to do stand counts. On August 8th, the area received a major storm with high winds and large hail. The storm did major damage to their farm setup and caused extreme damage to crops in that area, but they did not hesitate to rebuild with the help of friends and neighbors. Jim said they are seeing 50 to 80 bushels on corn and very low test weight in the rough areas. They have not yet attempted to harvest the soybeans. The plot location was hit directly, and the plots are lost. FIRST again would like to thank Jim and Sharon for their outstanding cooperation with us and wish them the best in their recovery.
