2026 Corn Grain Top 30 Harvest Report

Iowa South [IASO] LINEVILLE, IA

Bradley Vogel, Wayne County, IA 50147

Early-Season Test	106 - 111 Day CRM B2026IASO35a
Top 22 of 23	For Gross Income (Sorted by Yield) Average of (3) Replications
PREV. CROP/HERB:	Soybeans / Liberty, Ziduo Pro
SOIL DESCRIPTION:	Lawson silt loam, mod. well drained, non-irrigated
SOIL CONDITION:	Minimum W/O Fall Till, 6.2 pH, 3.1% OM, 13.0 CEC, high P, high K, low S, mod. B, high Zn
CROP PROTECTION:	Fultime Nxt (H), Mesocore (H)
FERTILITY - Applied N:	100 Spring, 3000gal Hog Slurry (Fall)
Applied N-P-K (units):	100-0-0
SEEDED - RATE - ROW:	May 9 35.0 /A 30" spacing
HARVESTED - STAND:	Oct 23 32.0 /A
PEST & DISEASE RISK:	Fusarium, Pythium, Bacterial Leaf Streak, Maize White Spot*

TEST COMMENTS:

This location was planted on the 9th of May and was dry until the 17th. At that time, it received 4.5 inches of rain, for a total of 11 inches above normal for the year. Emergence looked very good at stand count time, and at harvest the plants stood tall, and no major diseases could be seen. Ears were low on the stalk with very good-sized ears. The plot looked very strong, but once harvest started, we found complete strips flat on the ground, and the cobs had been stripped of kernels. The lodging was not throughout the plot but was targeted by wildlife. Jr. stated that his corn yields varied from field to field with the same hybrid but was really happy with his soybean yields this year. The plot would have been very strong if not for the damage. Due to the extent of the wildlife damage to certain hybrids, this early-season test will not be included in the regional summary.
