TEST COMMENTS:

This location was planted in ideal soil conditions, with nice and even emergence. Significant rain events throughout the growing season caused ponding in some areas of this farm that have historically stayed dry. Despite some of this season's stressors, this plot did extremely well. Tall, healthy plants with lots of green left in them were common across the location. Many hybrids had very good stalk and root quality, large cobs with nice kernel sets, and minimal tip back. Some variability throughout this plot was likely caused by water standing at times this year. Randy was pleasantly surprised at how well the crop has done despite this year's challenges.
