TEST COMMENTS:

This location was planted near the end of the season due to the very wet spring in this area. When it was finally planted, it went in very nicely. Wet weather continued throughout the early and mid-growing season, with nearly 45" of rainfall in this area year to date. Emergence was nicked a bit by the soggy soils at times, but the plants seemed to get through the season's stress. Overall, this location, as well as the surrounding area, yielded a lot better than Nick had anticipated. He was happy with the end results despite this year's challenges.
