TEST COMMENTS:

This field had several challenges this year. Planting was on time and planted into a no-till, clean seedbed. Wind and rain timing prevented a post-emergent herbicide application. The field was 75% clean, which is acceptable but not the level we usually have with our plots. The irrigation system went down 3 times during the season at key watering times (13.5 in of irrigation was applied). These were all uncontrollable issues. The site highlighted tough varieties with the soil type, high temperatures, and limited rainfall. This site was rejected due to high yield variability among hybrids.
