### TEST COMMENTS:

*This was the first time working with this farmer, and we will be back to this great dryland field location in NE Kansas. The overall uniform site was maintained weed-, disease-, and insect-free. This location had above-average rainfall, and crops looked healthy throughout the season. The field had an ideal season with nutrients, planting timing, herbicide applications, and weather. This was a great site and representative of what these varieties can do in this region.*
