TEST COMMENTS:

This new corn location was planted on May 3rd in excellent soil conditions. Rainfall was slow until mid-June, with a couple of heavy rain events. Emergence and stands were excellent. Overall rainfall stayed right on par with the 10-year average, setting the stage for great yields at harvest. This corn showed virtually no lodging, with strong stalks and large cobs. No significant disease or weed pressure was observed. The Bremmer family did an outstanding job with their herbicide program! We're happy to have them as part of the FIRST Trials!
