TEST COMMENTS:

This site was planted on May 7th in great conditions. There was good emergence and uniformity throughout the whole plot during stand counts. Rainfall was 5 inches above average this year, and when it did rain, it was heavy. During harvest, tar spot was present, and mild Fusarium ear rot occurred at the tips of the cobs. Other than these mild setbacks, the corn stood tall with healthy stalks, large ears, and no lodging. Overall, this was a great location.
